

Dialogues with Croucher Innovation Awardees

The Graduate School is pleased to offer opportunities for informal interactions between RPg students and Croucher Innovation Awardees, which aim at contributing to the development of critical questioning and thinking skills among RPg students in the emerging world of open innovation. Through these exchanges, the Awardees will share their experience and insights in innovative research, which also echoes one of the 3 'I' strategies of HKU – “internationalisation, innovation and interdisciplinarity”

Here are the details of the coming session:

Dr Heming Cui

Recipient of the Croucher Innovation Award 2016

Assistant Professor, Department of Computer Science, HKU

<http://www.cs.hku.hk/people/profile.jsp?teacher=heming>

Almost all scientific disciplines are getting more and more influenced by emerging computer science techniques, including cloud computing, big-data, and block-chains. It is therefore always a challenge for PhD students to select research topics that are both practical and novel. In this sharing session, Dr Cui will first introduce some of his recent research topics and their practical results, including a cloud fault-tolerance topic that received the 2016 Croucher Innovation Award. Then, he will briefly share with students on how to select practical and novel topics for dissertations and how to carry out research plans effectively.

Date and Time:

February 7, 2018, Wednesday, 12:45 pm to 1:45 pm

Venue:

Room P501 (*on Level P5, one level below the Wang Gungwu Lecture Hall*), Graduate House

Online registration at EMS for RPg students:

https://hkuems1.hku.hk/hkuems/ec_hdetail.aspx?UEID=54129

Sandwiches and drinks will be provided at the session. Don't miss this great opportunity to get inspired!
