## Managing Qualitative Research Data Using NVivo

The HKU Libraries is going to offer the following two NVivo workshops for the Graduate School.  The workshops are specifically designed for research postgraduate students.  Places are limited and registration is on a first-come-first-served basis.

**Managing Qualitative Research Data Using NVivo 12 for Windows**
Date and Time:         Nov 14 (Wed), 10:00 -13:30 (3.5 hours)
Venue:                 Seminar Room 2, G/F Main Library
No. of places:         25
Interested students should register online through EMS:
https://hkuems1.hku.hk/hkuems/ec_hdetail.aspx?UEID=60130

**Managing Qualitative Research Data Using NVivo 12 for Mac**
Date and Time:         Nov 29 (Thur), 10:00 - 13:00 (3 hours)
Venue:                 Seminar Room 2, G/F Main Library
No. of places:         25
Interested students should register online through EMS:
https://hkuems1.hku.hk/hkuems/ec_hdetail.aspx?UEID=60131

NVivo is a software package designed for qualitative research with rich text-based and multimedia data. It assists researchers to manage and analyze non-numerical unstructured data such as interview transcripts, audio and video files, images, PDF from literature review, and survey data.

The two workshops, targeting at beginners with no previous knowledge of NVivo, will cover the key features of NVivo 12 Pro for Windows or NVivo for Mac.  Participants will learn how to prepare their text and media data, import and organize their data, add notes and memos, and run queries.

Please note that these are *bring-your-laptop* workshops.  Before the workshop, each participant should have NVivo 12 Pro for Windows or NVivo 12 for Mac installed on their laptops or download the 14-day free trial version of NVivo 12 Pro for Windows or NVivo 12 for Mac at https://www.qsrinternational.com/nvivo/trial .
